3. Add file **02** to the Project. Start a new chat **inside that Project**. Send the message below.

B ORDINARY CHAT

Open a fresh chat. Attach file **02**, then send the same message below. No Project setup is needed.

Read the entire cartridge and run it.
Start WiiNdaVl‰uds.

Or add your own destination or mission to that message.

No attachment access? Paste all of file 02 into a fresh chat.
Engine unreadable? Attach it directly or paste its complete text.
For long-paste help, open **00_START_HERE.txt**.

Your words are the controls.

Use the normal ChatGPT message box. Suggested actions are optional. You decide what to try next.

An attempt can succeed, partly work, or meet an obstacle. The world responds; it does not choose your next move.
